

The Sand Fence System, also called as Animal Fence is used widely as a low security and demarcation solution. This system is essentially used to keep animals from crossing over to moving traffic and restricting their movements within their natural habitat.

## Benefits:

- Easy to install
- Very economical
- Ease of transportation
- Zinc coating provides an exceptional longevity to the entire system under the harsh climatic conditions
- Easily combined with animal grids

## Applications:

- Residential property, private farms
- Infrastructure projects
- Highways
- Demarcation uses

## Specifications:

Galvanized high tensile wire coupled with IPE or SHS posts.

Dropper bars, Aluminium Wire Vice and general accessories are used to complete the system.

Galvanizing standards:

BS EN 10244-2 for wires

BS EN 1461 for posts
