

Weld Mesh Fence System

High to Medium Security and demarcation

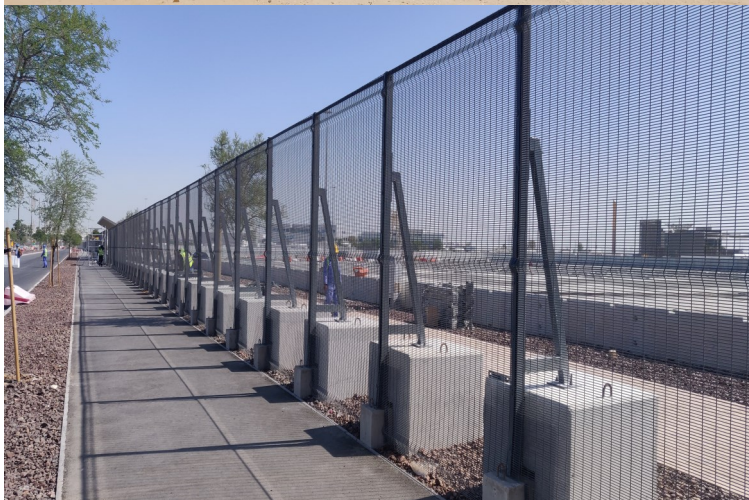

The Weld Mesh Fence system provides a high security deterrence for any application. Weld Mesh is essentially a machine welded rigid panel usually made of galvanized finish and eventually Poly-Vinyl Coating of desired colour.

Benefits:

- Sturdy and rigid panel
- Mesh sizes can vary as per application
- Easy installation
- Aesthetic yet provides higher security and the best physical barrier qualities

Applications:

- Residential property, private farms,
- Critical assets, airports, sea ports, onshore oil fields, prison outer perimeter
- Industrial property, warehouses, parking area, storage yards, machinery safety
- Utilities, power plants, solar farms, transformer areas, gas pipelines
- Schools, government buildings, border crossings, sports grounds, political borders

Weld Mesh Fence System

High to Medium Security and demarcation
